

## ***MISSION STATEMENT***

- To provide the best possible water and wastewater service at the lowest possible price.
- To anticipate the water and wastewater needs of the communities served and to prepare to meet those needs through sound management practices, engineering and financial planning.
- To expand into new service areas whenever feasible.
- To strive continually for cost reduction and greater efficiency.
- To initiate, promote, and keep abreast of advances in water and wastewater system technology.
- To recruit, train and motivate personnel capable of carrying out this policy in the years to come.
