## **TRIVIA ANSWERS**

- 1) About 80% of the world is covered by water or ice. Only about 20% is dry land.
- 2) 97% of the water is salty ocean, 2% is frozen and the remaining 1% is available to meet human needs.
- 3) The adult body contains about 40 quarts or 10 gallons.
- 4) 2-1/2 - 3 quarts per day under normal conditions (sweating, breathing, etc) If you exercise or live in a humid climate, you could lose another quart.
- 5) 2 - 3 quarts
- 6) Two months without food but less than a week without water
- 7) 1% or less. The rest goes on lawns, in washing machines, and down the drain.
